## Professional Summary

Full-stack software developer with 5+ years building e-commerce and ERP platforms, now operating in TPM capacities. Strong problem-solver with a background in API integrations, cloud infrastructure, database optimization, and UI/UX improvement. Delivers technical solutions and leads cross-functional initiatives, balancing deep coding expertise with program-level coordination.

## Core Skills

Languages & Frameworks: PHP, Java, Python, JavaScript, Node.js, Angular, React, Laravel  
Cloud & Infra: AWS (EC2, S3, Lambda), Docker, Linux, Apache  
Databases & Tools: MySQL, Oracle, Redis, MongoDB, ELK (Elasticsearch, Logstash, Kibana)  
DevOps & Automation: CI/CD, Docker containers, monitoring & alerting, Selenium scripting  
Integrations & APIs: REST, MQTT, UPS API, PayPal, SendGrid, OAuth, Webhooks  
Program Skills: Technical roadmaps, stakeholder management, requirements gathering, risk mitigation, Jira/Asana/Notion

## Professional Experience

### Hyundai AutoEver America — System Analyst & Technical Project Manager

Costa Mesa, CA · Oct 2024 – Present

- Performed root-cause analysis for connected-car services (Java Spring, Oracle, Redis, MongoDB, ELK, ESB, MQTT) and defined prioritized remediation plans.
- Coordinated cross-functional teams to implement ELK-based monitoring and alerting improvements, reducing incident detection time and improving MTTR.
- Supported service stability roadmap and risk assessments across Hyundai, Genesis, and Kia connected services.

### Hollywood Body Jewelry — Software Developer

Gardena, CA · Aug 2020 – Oct 2024

- Designed and maintained a custom ERP system supporting order, inventory, and warehouse workflows; improved operational throughput.
- Implemented UPS and PayPal integrations to automate shipping and payments, increasing transaction reliability.
- Optimized MySQL queries and schema patterns, improving API response times by ~30%.
- Built Python Selenium automation for web data extraction and reporting, reducing manual effort and improving data accuracy.
- Led warehouse efficiency and product visualization projects that improved fulfillment speed.

### International Digital Systems — Associate IT Consultant

Glendale, CA · Nov 2019 – Jul 2020

- Supported IT infrastructure and server performance tuning for KB Insurance; assisted in network troubleshooting and vendor coordination.
- Helped implement operational procedures to improve uptime and compliance.

### Ruppert Landscape — Software Development Intern

Laytonsville, MD · May 2018 – Aug 2018

- Developed subcontractor management web application using ASP.NET; improved data workflows.
- Tuned SQL queries and created financial reporting visualizations for management.

## Education

M.S., Computer Science — Towson University, Towson, MD · 2019

## Additional Information

- Authorized to work in the U.S. without sponsorship.
- Open to on-site or hybrid roles.
- Comfortable in hands-on engineering roles and TPM roles requiring technical leadership.
